### **Eco Waste Solutions to supply waste management equipment for Mt Milligan**

**BURLINGTON, Ontario** - Eco Waste Solutions is pleased to announce that it has been awarded the contract to design, build and supply an Eco Model waste system for the Mt Milligan Copper-Gold Project in northern BC.

Eco Waste Solutions was selected by the BCMJV (British Columbia Mining Joint Venture) - a Fluor-AMEC joint venture, the EPCM for this mining project. This purchase is part of a comprehensive approach to minimizing environmental impacts from the mine during operation and post-closure.

"We are pleased to see growing recognition that this technology can play a crucial role in dealing with waste as it is generated, and preventing a long term legacy impact" said Eco Solutions Executive Vice-President of Business Development, Jean Lucas. "This is another great example of the Canadian mining industry taking a leadership role in environmental responsibility."

#### **Company Information:**

Eco Waste Solutions is a privately-held Canadian company that specializes in advanced thermal treatment technology for solid and liquid waste. The systems offer a sustainable waste management alternative for customers, typically in remote locations, where traditional waste disposal options are not feasible. The technologically-advanced and easy-to-use systems have been field proven since 1994. Eco Waste Solutions has recently expanded the product line to include larger capacity equipment and technologies to capture heat by-products and harness energy from waste.
